Reading Time : **1 min**

By: David H. Quigley

Head of Akin’s environment & natural resources practice David Quigley is quoted by *Chemical Watch News & Insight* in an article titled, “New Mexico to use PRISM platform for PFAS reporting,” discussing New Mexico’s decision to adopt the Per- and Polyfluoroalkyl Substances (PFAS) Reporting Information System for Manufacturers (PRISM) for PFAS disclosures already used in Minnesota. The article draws on remarks David delivered at the PFAS Global Conference hosted by Chemical Watch, where he discussed the PFAS regulatory environment.

New Mexico’s decision likely came in response to challenges that other states, such as Maine, faced in developing earlier systems of reporting. David noted, “it required a tremendous amount of resources – not just to collect the reports, but someone has to review them.”
